

Capture Pilot™

Press Release

PHASE**ONE**

Phase One's Capture Pilot™ App now offers Camera Control.

COPENHAGEN, June 30, 2011

Phase One, the world's leader in open-platform based professional medium format camera systems and solutions, today announced the availability of Camera Control -- a new Capture Pilot option that lets photographers operate their cameras remotely via their iPhone, iPad or iPod Touch. This remote camera control frees photographers to shoot under scenarios that previously would have been difficult or impossible.

Camera Control is the newest feature of Capture Pilot™ which allows photographers to use their iPad, iPhone and iPod Touch to wirelessly view, zoom and pan high resolution DSLR and medium format RAW, JPEG and TIFF images while they are shooting. The application's rating and tagging features enable clients and colleagues in the studio or on remote locations to participate in the shoot and provide instant feedback.

Camera Control

Camera Control offers photographers an elegant, virtual camera display on their iOS device to remotely fire the camera and control the camera's most important capture parameters, including ISO sensitivity, exposure mode, shutter speed, aperture, exposure compensation and others.

Camera control supports a wide range of pro and semi-pro Canon and Nikon DSLRs, and Phase One, Leaf and Mamiya medium format camera systems.

Availability and Pricing

Camera Control is available now as an in-app purchase for USD14.99 / EURO11.99. Capture Pilot™ is a free app available from the Apple store that works with Capture One Pro. More information is available here: <http://www.phaseone.com/en/software/capture-pilot>

Capture Pilot with Camera Control requires version 6.2.1 or later of Capture One Pro, the raw conversion and image editing software that supports a wide range of pro and semi-pro camera models. Capture One comprises a full digital workflow to produce beautifully detailed and richly rendered images. For information about Capture One Pro, please see: <http://www.phaseone.com/en/Software/Capture-One-Pro-6/>

About Phase One

Phase One is the world's leader in open-platform based medium format camera systems and solutions. Phase One medium format cameras, digital backs and lenses are designed to deliver superior quality image capture and investment value. Phase One's Capture One software helps streamline capture and post-production processes for both medium format and digital cameras. Phase One products are known for their quality, flexibility and speed enabling pro photographers shooting in a wide range of formats to achieve their creative visions without compromise.
